Recycled Plastic Lumber

Long lasting and virtually maintenance-free, our recycled plastic (RP) Lumber is impervious to rot, mold, mildew, insects, moisture and other decay, making it a perfect alternative to wood furniture for any environmentally-conscious organization.

Composite Wood

Also called Wood-Plastic composite (WPC), composite wood are composite materials made of recycled organic wood material, such as sawdust, and thermoplastics such as PE, PP and PVCs.

Wood-composite materials do not corrode, and are resistant to rot and decay. Canaan's engineered wood features a co-extruded shield encasing all four sides around its core, providing scratch, stain, and fade resistance.
